

# **Application for a permit to operate Schedule 13 small waste incineration plant**

Local Authority . Pollution Prevention and Control  
**Pollution Prevention and Control Act, 1999**  
**Environmental Permitting (England and Wales) Regulations 2016**

## **Introduction**

### **When to use this form**

Use this form if you are sending an application for a Schedule 13 installation to a Local Authority under the above regulations.

### **Before you start to fill in this form**

Please read the General Guidance Manual for Part A2 and Part B installations. This contains a list of other documents you may need to refer to when you are preparing your application, and explains some of the technical terms used. You are also urged to speak to the officer who will be dealing with the application.

### **Which parts of the form to fill in**

You should fill in as much of this form as possible. The appropriate fee must be enclosed with the application to enable it to be processed further. When complete return to:

Environmental Health Commercial Team  
Calderdale MBC  
Town Hall  
Crossley St  
Halifax  
HX1 1UJ.

### **Other documents you made need to submit**

There are a number of other documents you will need to send us with your application. Each time a request for a document is made in the application form you will need to record a document reference number for the document or documents that you are submitting in the space provided on the form for this purpose. Please also mark the document(s) clearly with this reference number and the application reference number, if you have been given one. You can request an application reference number from the officer dealing with your application.

### **Using continuation sheets**

In the case of the questions on the application form itself, please use a continuation sheet if you need extra space; but please indicate clearly on the form that you have done so by stating a document reference number for that continuation sheet. Please also mark the continuation sheet itself clearly with the information referred to above.

### **Copies**

Please send the original and a copy of the form and all other supporting material, to assist consultation.

### **If you need help and advice**

We have tried to make the application form as straightforward as possible, but please get in touch with us at the address given above if you need any advice on how to set out the information we need.

### Section 4 Site plans

4.1 Please provide:-

\* A suitable map showing the location of the installation clearly defining extent of the installation in red

[Document reference Drawing 1 . Permit Boundary ]

\* A suitable plan showing the layout of activities on the site, including bulk storage of materials, waste storage areas and any external emission points to atmosphere

[Document reference Drawing 2 - Layout ]

\* A suitable plan showing the site drainage system and all discharge points to drainage or watercourses.

[Document reference Drawing 3 - Drainage ]

### Section 5 Waste types and activities

5.1 Complete Table 1 to provide a complete list of waste types to be incinerated in the plant. Refer to appendix for codes (use a separate sheet if required, Document reference\_\_\_\_\_)

Table 1: Waste types to be incinerated			
Code	Description	Source	Quantity (tonnes per annum)
19 12 10	Combustible waste (refuse derived fuel)	Adjacent waste transfer station (treatment of household, commercial and industrial waste)	10,000

**5.2 Delivery and reception of waste** Provide a description of the proposed waste reception and handling arrangements, including

- \* the precautions to be taken against the pollution of land, air and water
- \* precautions against noise and odour and other potential risks to human health
- \* how the mass of received waste will be measured

[Document reference Calder Valley SWIP application . Section 3.2 ]

**5.3 information about waste arriving at the site** Provide details of how information about waste being accepted on site will be collected and checked. You must include

- \* how you will check the documentation accompanying the waste
- \* how you will confirm the suitability of the waste for combustion, including physical and (as far as practicable) chemical information
- \* how you will determine the precautions to be taken in handling the waste
- \* the sampling of waste to be undertaken to check that the documentation is accurate

## Section 6 The small waste incineration plant

**6.1 Description of plant** Provide in Table 2 a full description of the plant, with additional information referenced. If there is no place in the table for the details please use a separate sheet.

Table 2: Description of plant					
Manufacturer		Inciner8		Proposed stack and discharge conditions	
Model		I8-1000		Stack height (m)	12
Year of manufacture		2020		Efflux speed (m/s)	21.3
Serial number (if known)				Efflux temperature (K)	573.15
Thermal input kW		1,500	Rate of incineration (kg/h)		2
Secondary combustion chamber/ afterburner					
Afterburner fitted	Yes	Inlet temp	1,300 °C	Additional information	Appendix D
Residence time (s)	2	Outlet temp	850 °C	Technical drawing	Appendix D

**6.2 Chimney height calculation and dispersion modelling** Provide a chimney height calculation and any available dispersion modelling information for the appliance described in Table 2

[Document reference Appendix E . Air Quality Assessment ]

**6.3 Secondary combustion temperature and residence time** Provide a secondary chamber residence time calculation or equivalent information from the manufacturer or supplier.

[Document reference Appendix F . CFD Flow Simulation ]

**6.4 Energy recovery** Provide a description of the proposed energy recovery from the incineration process, including any proposals for the generation and use of heat, steam or power

[Document reference Calder Valley SWIP application . Section 4.2 ]

**6.5 Monitoring** Provide details of the proposed emissions monitoring, including continuous monitoring, recording systems and periodic extractive monitoring. If any monitoring has been undertaken please provide the details of emission concentrations and quantify in terms of mass emissions. If no monitoring has been undertaken please state this.

[Document reference Calder Valley SWIP application . Section 3.13 ]

**6.6 Prevention of operation in certain circumstances** Describe the systems to be employed to prevent the feeding of waste into the plant until the secondary combustion chamber temperature is at least 850oC at startup or if the temperature falls below 850oC in operation or in the event of the failure of waste gas cleaning systems.

[Document reference Calder Valley SWIP application . Section 3.3 ]

**6.7 Minimisation of residues** Provide a description of the techniques to be used to minimise the amount and harmfulness of any residues from the incineration process, including any proposed recycling

[Document reference Calder Valley SWIP application . Section 3.8 ]

**6.8 Accidents and incidents** Describe the action you propose to take in the event of accidents or incidents involving the incinerator. You should describe each type of incident and the appropriate response.

[Document reference Calder Valley SWIP application . Section 5.4 ]

**6.9 Waste waters** Describe the precautions to be taken against the pollution of the soil, surface water or ground water. In particular, describe the containment arrangements for contaminated rainwater run-off from fire-fighting operations.

[Document reference Calder Valley SWIP application . Section 3.12 ]

## **Section 7 Management and training**

**7.1 Competent person** Describe how the person who will be responsible for the day to day operation of the incineration plant will be selected and trained, and how that person's competence to operate the plant will be checked and reviewed.

[Document reference Calder Valley SWIP application . Section 5.3 ]

**7.2 Environmental management system** Describe the management systems to be used to ensure that you comply with the conditions of an environmental permit if the application is granted. In particular describe

- \* the schedule of maintenance covering all plant and equipment at the installation
- \* record keeping systems covering the acceptance of waste, recording of maintenance, records of emission monitoring, training
- \* how employees are to be trained in their responsibilities in respect of compliance with the conditions of an environmental permit if it is granted
- \* notification of relevant bodies in the event of an incident or abnormal emissions
